

RECRUITMENT TRACKING SYSTEM - ALTRIUM HR

SPRINT 1 REVIEW

Dimanthi Hewagama - Scrum Master

Diheli Abeysinghe - Business Analyst

Dulathmi Dunuwille - Developer and Quality Assurance

Agile Roles and Sprint Goal

Agile Roles This Sprint

Dimanthi Hewagama
Scrum Master

Led stand-ups, coordinated the schedule, and kept the sprint on track.

Diheli Abeysinghe
Business Analyst

Gathered and documented requirements, communicated scope across the team.

Dulathmi Dunuwille
Developer and QA

Designed the scheme, built the auth system and tested it end-to-end.

Sprint Goal

Identify Altrium's recruitment-tracking needs, analyze the existing manual process, and deliver the Sprint 1 foundation : the product backlog, acceptance criteria, test cases, use case / activity / sequence diagrams, ERD and low-fidelity wireframes.

Core Feature

CV Uploads and Last-Reviewed Tracking

Sprint 1 Backlog

1. **Secure login**
2. **IT Admin: Create / edit / deactivate user accounts**
3. **IT Admin: Assign role-based permissions**
4. **IT Admin: Recruitment activity and audit logs**
5. **HR: Create, edit, and close job vacancies**
6. **HR: Configurable interview stages per vacancy**
7. **HR: Individual and bulk CV upload**
8. **Centralized candidate database**
9. **HR: Shortlist / reject candidates after CV review**
10. **HR: Assign interviewers and hiring managers**
11. **HR: Schedule interviews (date, time, panel, stage)**
12. **HR: Send interview invitation emails**
13. **HR: View all candidates**
14. **HR: Search and filter candidates**
15. **HR: Last-reviewed CV tracking**
16. **Interviewer: View assigned candidates and CVs**
17. **Interviewer: Record interview feedback (score + notes)**
18. **Hiring Manager: Advance / reject between rounds**
19. **HR: Retain candidate records after vacancy closure**
20. **Interviewer: Edit own feedback only**
21. **Feedback modification history (audit trail)**
22. **Hiring Manager: View feedback across interviews**
23. **HR: Send selection / rejection emails**
24. **Management: Recruitment dashboard**
25. **Management: Recruitment KPI monitoring**
26. **Management: Per-vacancy reports**
27. **Management: export reports as PDF**
28. **Leadership: org-wide recruitment dashboard**
29. **HR: Candidate history across vacancies**
30. **Hiring Manager: Compare shortlisted candidates**

Use Case Diagram - Entire Workflow

Activity Diagram - CV Uploads and Last-Reviewed Tracking

Brief Summary

Marking a CV as reviewed is a separate action from the Reject/Shortlist decision. HR must click 'View CV' to open the file and click on the candidates page only then that action records a candidate as who last reviewed it. It can happen before, during, or without a Reject/Shortlist decision ever being made.

Core Mechanism

The system records a CV as reviewed only when HR clicks 'View CV' AND on the candidate's page.

ER Diagram

Test Cases - CV Uploads and Last-Reviewed Tracking

Valid Test Case : TCI-84

:Steps: Upload CV → confirm & apply → open candidate → View CV

Expected: CV linked to candidate; reviewer name + date shown

Invalid Data Test Case : TCI-85

Steps: Upload CV → pick unsupported file → Upload

Expected: Error shown, file not uploaded

Validation Test Case : TCI-86

Steps: Upload CV → clear Name/Email → Confirm

Expected: Blocked, no candidate created

Non-Functional Test Case : TCI-87

Steps: Upload CV → file >5MB → attempt upload

Expected: Rejected instantly, no crash

Sprint Retrospective - Dimanthi Hewagama

Role held this sprint: Scrum Master

What went well

- Regular meetings help keep the team connected
- The team contributed well to the required sprint 01 activities
- We were able to make steady progress towards the sprint goal

Challenges faced

- One of the main challenges we faced during this sprint was miscommunication during our MS Teams calls
- Sometimes the information discussed was interpreted differently by different team members because of this we occasionally had to discuss the same requirement again

What I'd do differently next sprint

- Use diagrams or examples where necessary to explain requirements more clearly
- Summarise the main decisions and confirm that everyone has the same understanding before moving forward with a task

Sprint Retrospective - Diheli Abeysinghe

Role held this sprint: Business Analyst

What went well

- Client requirements were explicitly identified and communicated to the developer
- Clear diagrams including UML use case , sequence diagrams and activity diagrams were drawn to visualize the workflow described by the client.
- Gave clear feedback to the developer during weekly meetings so client requirements were always prioritized.

Challenges faced

- The use case diagram needed multiple corrections and updates
- Certain aspects of activity diagrams needed multiple clarifications between myself and the developer

What I'd do differently next sprint

- Make my specifications clearer by giving more detailed descriptions.

Sprint Retrospective - Dulathmi Dunuwille

Role held this sprint: Developer and QA

What went well

- **Successfully built the features the BA specified from the requirements/diagrams**
- **Tested each feature to confirm it matched what was asked**
- **Fixed bugs found during testing before they reached the viva**

Challenges faced

- **The BA's diagrams didn't always specify enough detail for development**
- **Missing details surfaced while building the flow, so I identified them and passed them back to the BA along the way**

What I'd do differently next sprint

- **Test every feature individually right after finishing it, instead of leaving testing for later**
- **Update the Jira board as each feature is completed, not in a batch afterward**

THANK
YOU!
